Perfil

Full Stack Developer (Backend-Focused) Java • Spring Boot • PHP (Laravel) • RESTful APIs • SQL • React • Angular

Formação Acadêmica

Systems Analysis and Development

PUC PR

Education focused on the development of web, mobile, and enterprise applications, with a strong foundation in programming, databases, IT infrastructure, and agile methodologies. Emphasis on software and hardware integration, information security, and software engineering best practices.

08/2025 – presente

Curitiba, PR

Experiência Profissional

Software Engineer (Web Applications)

Legislative Assembly of Paraná – Contractor via Via Facilities

Worked on the development and maintenance of institutional web systems, with a focus on backend development and application architecture. Implemented new features, fixed bugs, and performed continuous improvements on critical systems, following software development best practices, version control, and structured project organization.

Integrated applications with relational databases, internal APIs, and external services, ensuring security, performance, and reliability in a government environment.

Participated in the full software development lifecycle, including technical requirements analysis, implementation, testing, and ongoing support, collaborating with technical teams and administrative departments.

12/25 – presente

Curitiba, PR

Full Stack Developer

Apis solutions

Developed web applications for medical clinics and e-commerce platforms used by approximately 500 patients/users, utilizing PHP 8, Laravel, MySQL, and JavaScript. Implemented authentication systems, RESTful APIs, and administrative dashboards. Optimized SQL queries, reducing response times by approximately 40%.

01/2021 – 11/2024

Curitiba, PR

Field Technician

As services

Performed maintenance on ATMs, smart safes, and banking systems, including fault diagnosis, application of updates and patches, and ensuring operational availability and security.

01/2025 – 12/2025

Curitiba, PR

Projetos

Full Stack Authentication System using MERN Stack and JWT [↗](#)

Developed a full-stack application using the MERN stack (MongoDB, Express, React, Node.js) with JWT-based authentication, real-time user registration, and validation. Implemented a cloud deployment pipeline with the backend hosted on Railway and the frontend deployed on Vercel.

E-commerce Platform with Admin Dashboard

Developed a web-based e-commerce platform using PHP 8, MySQL, HTML5, CSS, JavaScript, Bootstrap, AJAX, and RESTful APIs. Integrated shipping and payment services for automatic shipping calculations and order processing. Includes a complete administrative dashboard for managing products, orders, and finances, with a modern and responsive interface.

Certificados

Full Stack Java Developer – EBAC [↗](#)

Completed a comprehensive web development program focused on Java, Spring Boot, RESTful APIs, HTML, CSS, and JavaScript, including hands-on front-end and back-end projects. [↗](#)

GFT Start #7 – Java Developer Bootcamp Digital Innovation One (DIO) [↗](#)

Intensive Java development program covering object-oriented programming (OOP), Spring Framework, RESTful APIs, SQL, Git/GitHub, and software development best practices, including practical challenges and market-oriented projects. [↗](#)

Python AI Backend Developer Bootcamp Digital Innovation One (DIO) [↗](#)

Backend development training focused on Python, RESTful APIs, databases, software architecture, artificial intelligence, machine learning, and automation using Pandas, NumPy, and FastAPI. [↗](#)

Introduction to Cybersecurity Cisco Networking Academy [↗](#)

Introductory course on cybersecurity covering digital threats, information security, cryptography, cyberattacks, and data protection practices. [↗](#)
